

ENGINEERED FOR LIVING
DESIGNED FOR LIFE

renka

architectural glazing

OUR VISION IS TO HELP REALISE YOURS

Renka offer the complete range of the best aluminium glazing products available – combining stunning aesthetics with engineering excellence.

Renka support home owners, builders and architects with a broad range of projects from full residential new builds to single product supply and installation.

With a keen eye for design and many years' experience in the industry, Renka's team of experts are able to help guide you through your options and select the perfect products to transform your property and enhance your quality of life.

Midlands-based, but covering the whole of the UK, this family business will help you create the home that you've always dreamed of.

SLIDING AND FOLDING SLIDING DOORS

Whether you're planning a new build, a large renovation, or installing replacement glazing, Renka's range of sliding and bifold doors can transform an ordinary room into a stunning feature and help combine your internal and external space.

The contemporary styling of our products can create a bold architectural statement, bring light flooding into your house and open up your living space and garden for modern living.

Renka's range of sliding and bifold doors combine beautiful aesthetics, engineering excellence and class leading security.

WINDOWS

Bring character and style into your home and transform the ordinary into the spectacular with our range of windows, fixed and shaped panels.

Whether you're looking for panoramic feature windows, tilt and turn or casement windows we have a broad range of systems that can match the style and design aims of your property.

From our slim profile contemporary and "critall style" windows, to traditional and flush casement systems in both aluminium and high quality UPVC, all of our windows share the same uncompromising performance and stunning aesthetics.

ROOFLIGHTS

Add light and height to transform your property with our range of flat, monopitch, double hipped and self supporting glass roofs.

We recognise that no two homes or projects are truly alike, which is why we tailor every aspect of our products' design to meet your needs.

From fixed or electrically opening flat rooflights to double hipped rooflights designed for flat roofs, we can help you maximise the natural daylight coming into your home at the same time as providing a sleek aesthetically pleasing finish both inside and out.

Let Renka help you deliver more sky and less roof.

ARCHITECTURAL GLAZING

Often the most dramatic visual feature on a property, architectural glazing can make your house truly unique.

Whether you're considering curtain walling, gable glazing, frameless glazing, glass to glass corners or glazed balustrades, Renka has the experience of designing and delivering bespoke glazing and helping your ideas come to life.

The only limit to what can be achieved is your imagination!

ENTRANCE DOORS

Your entrance door says a lot about you. It shows your personality and style, and should be as special and individual as you are.

Renka's residential entrance door ranges offer the ultimate combination of advanced security, tasteful aesthetics and thermal efficiency. A keen eye for good design – whether traditional or contemporary – lies at the heart of our doors, and we can offer a wide range of styles, panel choices, and colours, all produced and installed with passion, professionalism and attention to detail.
