

# Renka rooflights and bespoke glazing

**renka**  
architectural glazing

## Glazing solutions as individual as your ideas

For more than 15 years Renka have been installing truly amazing bespoke glass extensions, glass floors, walls, rooflights and curtain walling. As well as supplying and installing a range of the most beautiful and technically advanced slim sliding doors, when combined with a Renka rooflight or bespoke glass structure, the finished result becomes a truly outstanding architectural centrepiece for your project

### Flat rooflights

Creating the illusion of open roof space, the minimalistic external and internal sightlines of our flat rooflights have a sleek, modern appearance and are a stunning addition to any home extension. Available in a range of external RAL colours with white internally to create a seamless upward view.

Flat rooflights are available in fixed or electrically openable configurations, and in a range of standard sizes, with either double or triple glazed units.

Sizes up to 2.4 metres by 1.2 metres (external kerb dimensions) are generally produced in a single sash. Beyond this, larger expanses can be supported with either steel T section supports (standard) or stunning laminated glass fins.

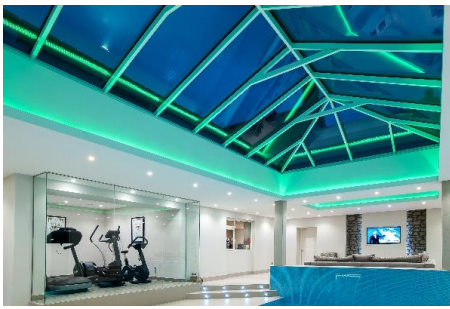

### Pitched rooflights

Designed to be incorporated into pitched roofs, Renka have designs available to suit all types of roof coverings.

Available in fixed or electrically openable configurations, and in a range of standard sizes, with either double or triple glazed units.

# Renka rooflights and bespoke glazing

## Double hipped rooflights

Our double hipped rooflights are made to your bespoke size and can be produced at a range of pitches from 10 to 45 degrees. We offer a range of contemporary and traditional rooflight styles.

Available in high quality powder coated finishes to any standard RAL colour of your choice, including dual colour (i.e. different colours internally and externally).

## Monopitch rooflights

Renka's monopitch rooflights allow large roof areas to be glazed – whether in a pitched tiled roof, in a side return extension or lean to. Double monopitch roofs are also available, to deliver a dramatic apex to a roof.

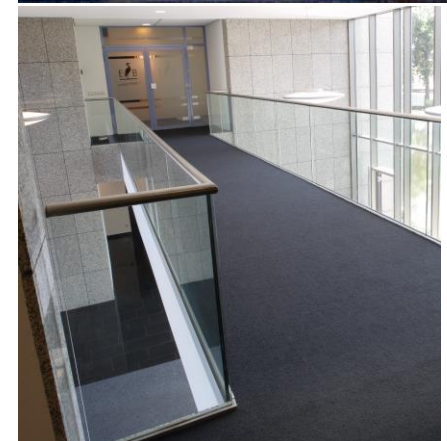

## Bespoke and architectural glazing

Renka have a range of frameless and architectural glass structures suitable for a variety of applications.

We are experienced at delivering structurally bonded frameless window seats, fixed frameless glazed panels and a range of bespoke products suitable for glass extensions.

In addition, we can supply:

- large sections of curtain walling in a range of designs
- Glazed link sections between 2 previously separate buildings / rooms
- Glass balconies and balustrades
- Structural glass beams
- Shaped and gable glazing

## Glass options

Depending on the type of glazing, you will have the choice of double or triple glazing, solar control or easy clean / self cleaning glass. Not all types of glazing are available on every product. Please ask for more details.
