

RS130  
ALUMINIUM  
SLIDING DOORS

RS SERIES  
PREMIUM SLIDING  
DOOR SYSTEMS

RS130

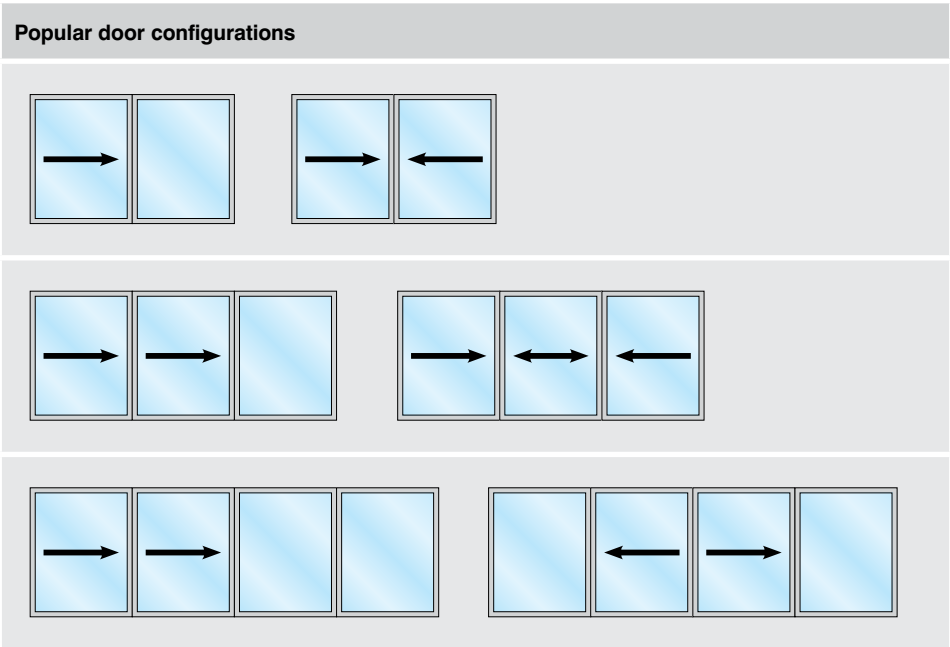

Transform the look of your property at an affordable price with our aluminium sliding doors.

One of our most popular products – available in a range of sizes, configurations and colours. The RS130 lift and slide door offers high security multi-point locking systems, thermally broken aluminium and a choice of configurations.

- Lift and slide door
- Factory finished
- Excellent U Values
- Low Threshold
- Fully weather rated
- Panels up to 2700mm width and 2700mm height
- Moving corner and pocket door options available

In addition to our sliding doors, we also offer a range of bifold doors, windows, roof lights and entrance doors.

RS SERIES  
PREMIUM SLIDING DOOR SYSTEMS

The RS130 benefits from a flat topped track which gives the doors an ultra-smooth glide, allows easy maintenance, and takes away the trip hazard that a door system with a recessed track can present

RAL 9005

RAL 9016

RAL 7016

Available in over 200 RAL colours – the above are our most popular

Transform the look of your property with our premium aluminium sliding doors.

Whether you are planning a renovation or a complete new build project, Renka sliding doors can transform an ordinary room into a key feature of the house, giving your home a real wow factor.

Its innovative design makes the RS130 a practical, easy to use and easy to live with sliding door that effortlessly opens up your living space.

Renka sliding doors are a premium insulated sliding system combining both great aesthetics with state-of-the-art of performance.

# RS SERIES PREMIUM SLIDING DOOR SYSTEMS

RS SERIES PREMIUM SLIDING DOOR SYSTEMS

## ENGINEERED FOR LIVING

Renka sliding doors open up a multitude of possibilities. Open this door just a few centimetres for a little fresh air, a little wider to slip out into the garden or open it all the way to really let the outside in. This versatile door creates an extra feeling of space and generates more natural light within the home.

All RS Series sliding doors use durable, stainless steel wheels and rails for ease of operation. In the case of the lift and slide system, the sliding door is lifted slightly before opening or closing. This reduces the friction and makes the operation smooth and effortless. In the closed position, the lift and slide door is lowered onto the track, providing additional weather resistance.

## Features and benefits

### Monorail system

A monorail system combines a moving part with a fixed glazed element that is anchored directly into the outer frame profile for a minimalistic look. The fixed pane is normally set to the inside of the track and is internally beaded. If the Minergie specification product is required, the fixed pane will be set to the outside of the track and will be externally beaded.

### Duo rail system

A duo rail system integrates two glazed opening vents with an identical appearance, giving an aesthetically pleasing and versatile sliding door. Both vents can be made as sliding elements, giving total flexibility.

### 3 rail system

A 3 rail system makes it possible for a third opening vent to be installed. This solution allows the user to slide door leaves one and two behind leaf three, opening up two-thirds of the width to the garden.
